

The Emagined Security Promise

Emagined Security promises to protect, anticipate and prepare for the challenges we face on a daily basis. Your organization can depend on us to anticipate, protect, react, and deliver security solutions tailored to meet your business needs and requirements. We will react to threats in real time as well as deliver and continually provide the highest quality services and deliverables. Emagined Security will bring the optimal balance of people, process and cost-effective technology solutions, so you can rely on us to protect your assets as well as your image.

Anticipate - Protect - React - Deliver. It's what we do best.
We are your partner in Information Security.

Comprehensive Security Services

Emagined Security focuses on securing business solutions by providing a full complement of Proactive, Real-Time, Reactive, and Executive Advisory services to global institutions and major corporations while providing a fully business-driven approach. Our services offerings are strategically segmented into six service lines:

- **Proactive Security Consulting & Assessment**

Emagined Security has a deep understanding in risk management. We have developed Proactive Security Consulting services to help business functions prevent losses by identifying and remediating risk vulnerabilities & compliance issues before they impact business processes, operations and audits.

- **Real-Time Monitoring & Managed Services**

Security Monitoring and Management, through our Symantec partnership, allows organizations to focus resources on business initiatives instead of diverting resources to monitoring threats and security systems. With outsourced monitoring, management, and alerting services, internal resources can be better utilized to support the business' core competencies.

- **Reactive Incident Response Services**

Emagined Security responds with highly skilled, senior security specialists to assist clients in a time of need, 24x7, anywhere in the world. Our proven Incident Response Methodology will help guide you to quickly and efficiently contain, eradicate and recover from any incident that may occur.

- **Executive Advisory Services**

Emagined Security empowers security executives with information and strategic support. We provide a suite of executive level offerings to support key decision making, support strategic planning, compliance, program design, team training, and reputation management, allowing the executive to spend more time running the security organization.

- **Licensing Advisory Services**

Acquisition of security software licenses and vetting vendors can be a long and frustrating process. Through our past experience, we can offer you decreased time to selection and show significant cost savings on licensing by assisting you with selection of an appropriate level of licensing and services for your organization's needs.

- **Support Services**

Emagined Security offers solutions based on supporting your fluctuating needs. Whether you need complete programming projects or a dedicated resource on-site today, we can provide you with quick turnaround and expert support.
