### **The Business**

Emagined Security was created to offer corporations a comprehensive array of sophisticated, adaptive security solutions that include both consulting and managed services. In support of this initiative, Emagined Security has built a highly talented organization specializing in security consulting. Emagined Security focuses on securing business solutions by providing a full complement of proactive, real-time, reactive, and knowledge sharing security services to global institutions, Fortune 500 companies, and other, smaller organizations while providing a fully business driven approach. Emagined Security's clients cover a wide range of industries including the financial, energy, healthcare, pharmaceutical, and high-tech industries.

Emagined Security offers a reliable, high-quality and cost effective alternative to in-house resources for security efforts. Emagined Security takes pride in employing only well-known and respected individuals from the security community.

Emagined Security offers consultants with high levels of knowledge, industry certifications and practical experience. Our clients have come to know that working with Emagined Security is a professional, low risk way to develop and secure new business initiatives or increase security in an existing heterogeneous setting of legacy distributed technologies.

## **Services:**

### **Proactive Security Consulting & Assessment**

Emagined Security understands true risk management and has developed Proactive Security Consulting services to help business functions prevent losses by identifying and remediating risk, vulnerabilities & compliance issues before they impact business processes, operations and audits.

- Ethical Hacking
- Assessment & Design
- Mergers, Acquisition & Partnerships
- Privacy & Compliance
- Strategic Planning
- Regulation Planning
- Configuration Reviews

### **Real-Time Monitoring & Managed Services**

Security Monitoring and Management allows organizations to focus resources on business initiatives instead of diverting resources to monitoring threats and security systems. With outsourced monitoring, management, and alerting services, internal resources can be better utilized to support the business' core competencies.

- Monitoring & Managed Services
- Threat & Vulnerability Alerts

### **Reactive Incident Response Services**

Emagined Security responds with highly skilled, senior security specialists to assist clients in a time of need, 24x7, anywhere in the world. Our proven Incident Response methodology will lead to efficient and cost-effective containment of incidents as well as eradication of the cause and recovery from any changes or

damage that may have occurred.

- Incident Planning
- Incident Response
- Incident Analysis
- eDiscovery Architecture Design & Implementation
- Cyber & Security Litigation Support
- Business Continuity & Disaster Recovery

### **Executive Advisory Services**

Emagined Security empowers security executives with information and strategic support. We provide a suite of executive level offerings to support key decision making, support strategic planning, compliance, program design, team training, and reputation management, allowing the executive to spend more time running the security organization.

- CISO On-Demand
- Corporate Strategy
- Cost Reduction & Consolidation
- Comprehensive Audit Services
- Security Education

### **Licensing Advisory Services**

Acquisition of security software licenses and vetting vendors can be a long and frustrating process. Through our knowledge and experience, we can substantially decrease your time to selection and help you achieve significant cost savings on licensing by assisting you with selection of an appropriate level of licensing and services for your organization's needs.

- Acquisition & Implementation Services
- License Adequacy Evaluation
- Vendor Support Services

## **Support Services**

Emagined Security offers solutions based around supporting your fluctuating needs. Whether you would like us to complete programming projects or if you simply need a dedicated resource on-site today, we can provide you with quick turnaround and expert support.

- Project Management
- Resource Augmentation
- Secure Web Application Development
- Implementation Services
- Analytics & Automation
